FROM THE HEAD OF CURRICULUM -BUSY BEE SCHOOL

I would like to take this opportunity to welcome our students and parents back to school for the new academic year , for all the new students and parents ... we at Busy bee are elated to have you as part of the family. Over the holiday we had an opportunity to prepare ourselves for this academic year, I would like to share a few snippets on the perks of the new curriculum

- Ms. Veronica Muli, Head of Curriculum. Busy Bee school.

The one two three of CBC

Distinction Of Theory And Practical

The learners are tested on the ability to distinguish what they have learnt in class and how practically they can follow instructional approaches in applying the skills outside the classroom. In this manner, the teachers can identify every learner's potential and know what works for them.

As a result, it becomes easier to help the learner improve their strength and overcome their weaknesses

Parental Empowerment And Engagement

The CBC form of education requires parents to participate in their children's positive outcomes during their primary education levels. The parents provide a conducive learning environment by being the 'learners', which motivates the learner to progress in their learning institution.

Parents need to collaborate with the teachers in providing basic requirements as per the school curriculum demands to enhance the smooth progress of uninterrupted studies.

Learner-Focused System

CBC education system major focus is on the learner as an individual rather than the school performance. As a result, the teachers can familiarize themselves with the student's demands regarding strength and weakness. Learners hence create a good relationship with teachers who help them shape their talents and careers.

Expands Learner's Opportunities

CBC provides learners with diverse opportunities to learn from. It narrows the scope for teachers in talent identification and potential exploration according to learner needs and capabilities. The system encourages learners to develop a positive attitude towards education by allowing them to access equal education opportunities.

The focus is on discouraging school dropouts as many learners can enjoy exploring their various fields of interest

Balanced Education System

The education system provides a distinctive assessment in many areas of the learner's development in classwork and co-curricular activities. According to CBC, the learner's ability is tested all-round.

Synchronous Development

The CBC system encourages corporate learning with learners to assimilate, enhancing positive growth among learners compared to meaningful learning where little positive change is realized

TO OUR MOMS...

For forever being society's pillar of strength, we take this opportunity to honor and show gratitude for your undying support, love and care. We adore you, your hearts are gems and with your tenacity we are confident there is no obstacle that can stop us. (More photos can be accessed on the school website www.busybeeschool.sc.ke)

FROM THE OFFICE

We are currently admitting for the 2022 academic year. Limited slots are available from Creche to Std. 7.

Applications should be submitted online via <https://busybeeschool.sc.ke/admissions/>

For any queries, kindly contact the administrators as follows:

Tudor - 0700509595 ; Nyali (Primary) - 0727551547; Nyali (Kindergarten) - 0723386226

We have created a new email ,where by anyone can raise suggestions on the day to day running of the school. You are all invited to take a look at the our website and utilize the email whenever necessary @

suggestionbox@pcas.co.ke
